How much should you give?

You should give as much as it feels comfortable giving.

We encourage people to choose a percentage from the household income 1%, 3%, 5%, 7%, 10% or more.

Imagine if each of us gave 10% from our annual income. If the household income was only \$50,000 a year – with hundred families that would mean a \$500,000 budget.

Imagine how much more we could do.
